

the art of elevation!

Self Propelled Personnel Lift

Leonardo
the Italian genius

Safe, comfortable and cost effective, the self-propelled Leonardo Lift replaces the need for ladders and steps.

The Leonardo is easy to transport and with its compact design, it's ideal for even the most cramped working environments!

The result of 10 years technological testing - **The Leonardo is the simple solution to access!**

- Working height of 4.9 m, with an extended platform length of 0.68m by 1.71m
- Self Propelled, enabling you to drive when fully elevated
- Compact size and weight allows easy transportation
- Easy to operate with simple controls for positioning and elevating
- 250 operations on one battery charge – will increase productivity
- Wheel locking device allows you to drive forward and backward in a straight line when accessing narrow aisles
- Low maintenance systems – saves you time and money!
